Instl. Class shares incepted on 4/29/2008, while Inv. Class shares incepted on 1/31/2011. MSCI ACWI and World (gross) since inception returns are for the period ended 4/29/2008. Effective October 1, 2018, the Fund's benchmark changed from the MSCI World Index (Gross) to the MSCI ACWI Index (Gross). Causeway believes that the MSCI ACWI Index (Gross), which includes emerging as well as developed markets, better represents the types of securities in which the strategy invests. Performance greater than one year is annualized. The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth less than their original cost and current performance may be lower than the performance quoted. For performance as of the most recent month-end, please call 1-866-947-7000. Investment performance reflects fee waivers. In the absence of such fee waivers, total return would be reduced. Gross expenses before investment adviser fee waivers are 1.08% for Institutional Class shares and 1.33% for Investor Class shares. The waivers are contractual and in effect until 1/31/2020. Investor Class shares charge up to a 0.25% annual shareholder service fee. Total returns assume reinvestment of dividends and capital gains distributions at contractual net asset value when paid. A 2% redemption fee applies to shares redeemed less than 60 days after purchase. Your performance will be lower if a redemption fee is applied to your account.

Relative weight defined as Portfolio weight minus Index weight. Index emerging subtotal includes market weights not listed individually.

The United States allocation includes holdings in Linde plc, which resulted from the merger of Linde AG in the fall of 2018. Although Causeway normally classifies Linde plc in Germany given its German listing and continuity with the historical holding, MSCI has classified it in the United States. Therefore, to facilitate country performance attribution for your account relative to MSCI classifications, we have included Linde plc in the United States for reporting and attribution purposes. Note that, for compliance purposes, we classify Linde plc in Germany.

ATTRIBUTION ANALYSIS: CONTRIBUTORS TO RELATIVE PERFORMANCE BY INDUSTRY for the month ended April 30, 2019

Causeway Global Value Fund Review for Month Ended April 30, 2019

Commentary Highlights

- **After a first quarter recovery rally, equity markets continued to rise in April as monetary policy remained accommodative in most regions globally, especially in the US and China.**
- **We currently expect interest rates to stay very low for at least the next four quarters in Europe and (assuming no early progress on a Brexit deal) unchanged in the UK.**
- **By next year, we expect the US yield curve to turn upward, albeit modestly, which should de-rate the most speculative and leveraged segments of the markets. We focus our research efforts on the most undervalued stocks globally that trade at multiples consistent with a deteriorating economic cycle and structural disruption.**

Performance Review

After a first quarter recovery rally, equity markets continued to rise in April as monetary policy remained accommodative in most regions globally, especially in the US and China. The top performing markets in our investable universe were Egypt, South Africa, Germany, Austria, and Ireland. The worst performing markets were Turkey, Pakistan, Colombia, Chile, and the Czech Republic. The best performing sectors in the MSCI ACWI Index ("Index") were financials, information technology, and communication services. The worst performing sectors were health care, real estate, and utilities.

Causeway Global Value Fund ("Fund") underperformed the Index during the month, due primarily to stock selection. Fund holdings in the pharmaceuticals & biotechnology, energy, media & entertainment, and software & services industry groups, along with an overweight position in the telecommunication services industry group, detracted from relative performance. Holdings in the banks, capital goods, insurance, and automobiles & components industry groups, as well as an underweight position in the real estate industry group, offset some of the underperformance. The largest detractor was Takeda Pharmaceutical Co., Ltd. (Japan). Additional notable detractors included mobile telecommunications operator, China Mobile Ltd. (China), British American Tobacco plc (United Kingdom), pharmaceutical company, AstraZeneca Plc (United Kingdom), and specialty retail jeweler, Signet Group (United States). The top contributor to return was automobile manufacturer, Volkswagen AG (Germany). Other notable contributors included global financial services giant, Citigroup, Inc. (United States), life insurer, Prudential Plc (United Kingdom), banking & financial services company, UniCredit S.p.A. (Italy), and diversified chemicals manufacturer, BASF SE (Germany).

Economic Outlook

US gross domestic product ("GDP") expanded at a 3.2% annualized rate in the first quarter, although household spending and business fixed investment slowed. Another positive sign emerged in the US labor market as the unemployment rate remained steady and wage growth increased in March compared to the prior year, although at a slightly slower pace than in February. US inflation, as measured by the Consumer Price Index, remains below the US Federal Reserve's ("Fed's") target rate of 2%. At the Fed's latest meeting, Fed Chair Powell announced no change to interest rates and indicated no bias to either cut or raise rates in the near term. In the Eurozone, the European Central Bank ("ECB") reaffirmed an accommodative stance, holding rates steady in April, and is expected to maintain the current level through the end of 2019. Core inflation in the Eurozone slowed to 0.8%, the lowest level in a year, providing further

justification for the ECB to continue its bond buying program and financing of Eurozone banks. Manufacturing continues to be weak in the region, with the IHS Markit Manufacturing Purchasing Managers Index (“PMI”) reading firmly in contraction territory at 47.9 in April. The April Eurozone Services PMI fared better, but still pointed to the weakest expansion in three months, with the latest reading at 52.5 – down from March’s 53.3. European employment data, however, was a notable bright spot; job creation gained momentum and rose to a five month high in the region. The European Union granted the UK a flexible Brexit deadline extension to October 31, 2019, fending off the immediate threat of a no-deal Brexit. The UK manufacturing PMI slowed in April from its twelve month high reading of 55.1 in March, but remained solidly in expansion territory. UK retail sales climbed 6.7% in March from a year prior amidst a robust labor market and solid wage growth. We currently expect interest rates to stay very low for at least the next four quarters in Europe and (assuming no early progress on a Brexit deal) unchanged in the UK.

In China, the government has initiated stimulus programs to boost demand. This was evident in the first quarter GDP growth rate at 6.4% annualized, unchanged from the fourth quarter of 2018. Industrial production and retail sales also increased in March. First quarter aggregate total social financing, a broad measure of credit and liquidity in the economy, have surpassed levels of credit expansion in previous years. We currently expect increased credit growth, along with a resolution this summer to the US-China trade negotiations.

Investment Outlook

The past decade of massive global monetary accommodation has produced side effects such as asset inflation, fiscal deficits, and rising levels of private and public sector debt. The excess liquidity in public equity markets has investors apparently indifferent to valuation in their efforts to gain exposure to growth. As the pace of monetary liquidity expansion slows, we expect rewards for those engaging in price discovery and identifying undervaluation. Valuations between the cheapest and most expensive quintiles of the market have widened to extreme levels, and non-US stocks are trading at historically large discounts to the US market. Valuations of long duration growth equities (e.g., stocks with much of the payoff for shareholders promised many years in the future) have continued to soar. By next year, we expect the US yield curve to turn upward, albeit modestly, which should de-rate the most speculative and leveraged segments of the markets. We focus our research efforts on the most undervalued stocks globally that trade at multiples consistent with a deteriorating economic cycle and structural disruption. The greatest challenge we face is embedding value in the portfolio without causing excess beta and cyclicality. This is especially difficult in European markets where investors remain highly risk averse, bidding most low volatility stocks to hefty valuation premiums over those more sensitive to the economy. Value investing requires patience, and value should earn a premium because its cycle is so hard to time. We are most interested in companies generating increasing amounts of surplus cash flow and returning that capital to shareholders as quickly as possible.

The market commentary expresses the portfolio managers’ views as of the date of this report and should not be relied on as research or investment advice regarding any stock. These views and any portfolio holdings and characteristics are subject to change. There is no guarantee that any forecasts made will come to pass. Any securities identified and described do not represent all of the securities purchased, sold or recommended for the Fund. Index returns, if any, are gross of withholding taxes, assume reinvestment of dividends and capital gains, and assume no management, custody, transaction or other expenses. The reader should not assume that an investment in any securities identified was or will be profitable.

MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products.

To determine if the Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing. Please read the prospectus carefully before you invest or send money. To obtain additional information, call 1-866-947-7000 or visit us online at www.causewayfunds.com.

Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with equity investing, international investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Current and future holdings are subject to risk. There is no guarantee that securities mentioned will remain in or out of the fund. Diversification may not protect against market risk. There is no assurance that a Fund will achieve its stated objectives.

FY2 P/E is the weighted harmonic average 2-year analysts' consensus forecast price-to-earnings ratio. Price-to-book value ratio is weighted harmonic average, and return on equity is weighted average.

Dividend Yield shows how much a company pays out in dividends each year relative to its share price. A company may reduce or eliminate its dividend, causing losses to the Fund.

Beta is a measurement of sensitivity to the benchmark index. A beta of 1 indicates that a portfolio's value will move in line with the index. A beta of less than 1 means that the portfolio will be less volatile than the index; a beta of greater than 1 indicates that the security's price will be more volatile than the index.

Performance attribution charts show where the Fund's investments performed better or worse than the benchmark index during the month. Attribution is based on the return of the Fund's holdings gross of management fees and other expenses, and before any Fund fair valuation. Past performance does not guarantee future results.

Holdings are subject to change.

Effective October 1, 2018, the Global Value Fund's benchmark changed from the MSCI World Index to the MSCI ACWI Index. The MSCI ACWI Index is a free float-adjusted market capitalization index, designed to measure the equity market performance of developed and emerging markets, consisting of 23 developed country indices, including the U.S, and 24 emerging market country indices. Prior to October 1, 2018, the benchmark index for the Global Value Fund was the MSCI World Index. This Index is a free float-adjusted market capitalization weighted index, designed to measure developed market equity performance, consisting of 23 developed country indices, including the U.S. The Indices are gross of withholding taxes, assume reinvestment of dividends and capital gains, and assume no management, custody, transaction or other expenses. It is not possible to invest directly in an index.

The Morningstar Analyst Rating is not a credit or risk rating. It is a subjective evaluation performed by Morningstar's manager research group, which consists of various Morningstar, Inc. subsidiaries ("Manager Research Group"). In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission. The Manager Research Group evaluates funds based on five key pillars, which are process, performance, people, parent, and price. The Manager Research Group uses this five pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark, or in the case of exchange-traded funds and index mutual funds, a relevant peer group, over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weight of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's conviction in a fund's prospects for outperformance.

Analyst Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to global.morningstar.com/managerdisclosures/.

The Morningstar Analyst Rating (i) should not be used as the sole basis in evaluating a fund, (ii) involves unknown risks and uncertainties which may cause Analyst expectations not to occur or to differ significantly from what they expected, and (iii) should not be considered an offer or solicitation to buy or sell the fund.
